### **Website Interaction Map:**

The website was displayed on the large screen and discussion followed regarding which format/application would be best suited as an interface for users of the map. There was some concern expressed about using "Google Earth" as the default application. Rochelle will meet with Carol Zollweg and discuss other options and report back to the group.

### **Map Guide:**

There was much discussion regarding categories, location, and description of items on the map guide. Rochelle took detailed notes and will make revisions to the master spread sheet. A list was compiled of who would write descriptions of specific locations. The list will be sent via e-mail.

Judy Spring reported that the newsletter was progressing and that additional articles were needed.

**Display Boards:**

George Squires transferred the large board to Lyle Warren for use at the Riga/Churchville Arbor Day event.
